MICROWELL

European manufacturer of swimming pool dehumidifiers, heat pumps and germicidal air purifiers.

2025 PRICE LIST

Swimming pool HEATING &
DEHUMIDIFICATION solutions
UV Air Disinfection systems

Valid from: FEBRUARY 13, 2025

WHY MICROWELL?

VARIETY OF MODELS
WIDEST RANGE OF DESIGN AND ACCESSORIES
EXCELLENT CRAFTSMANSHIP AND EXPERIENCE
INNOVATIVE ENGINEERING, CUTTING EDGE ROBOTICS
EUROPEAN QUALITY, LOCATED IN SLOVAKIA
750+ PARTNERS IN 40+ COUNTRIES
COMPETITIVE PRICES
ACCREDITED BY ISO 9001, ISO 14001, ISO 45001

MICROWELL
Committed to efficiency

Ing. Tibor Kovács, CEO

Dear Business Partners,

With great respect and gratitude, let us introduce our new Pricelist which is not only a showcase of our products, but also a reflection of our long-term efforts and determination to bring our customers the best solutions.

Our company Microwell has been operating on the market for more than 25 years, during which we have tried not only to keep up with technological developments, but also to exceed the expectations of you, our customers. This journey would not have been possible without your continued support and loyalty.

For many, the year 2024 was marked as a year full of challenges, unfortunately accompanied by some unfavorable economic and geopolitical factors. The ongoing conflict between Russia and Ukraine, economic and political instability of EU, significant inflation, etc. affected both global and local markets. Despite these difficult conditions, we at Microwell did not hesitate and continued to fulfill our vision, which is to bring top technological solutions to our customers.

In 2024, we reached an important milestone in the field of technology and innovation. We have built a specialized test chamber that enables thorough testing and improvement of our products. Even in this difficult time, we have successfully implemented a number of projects focused on technical-technological development and product design enhancement. This has resulted is several innovations listed in our product portfolio. In the field of pool dehumidifiers, we have introduced several important novelties such as SoundSteel technology/Improved noise reduction thanks to the double silent block, new generation of controllers, PV ready solution, new aluminum covers, DRY Orient design - Wi-fi and RS 485-485 (Modbus) option for DRY products for easier monitoring and management system.

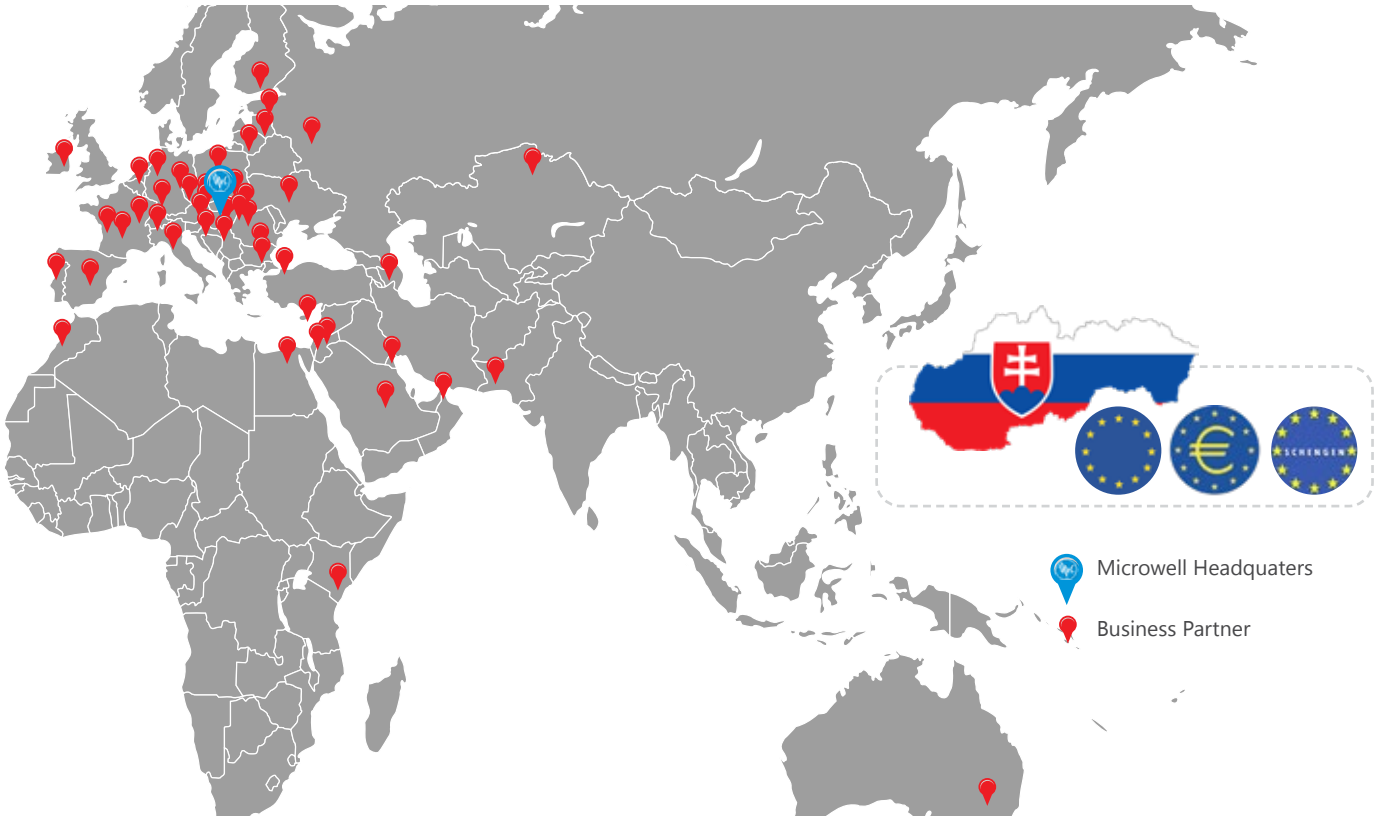
Our next significant step was the introduction of a new line of HP SILVER Inverter Pro year-round swimming pool heat pumps. These products stand out not only for their technological excellence, but also for their attractive design, that meets the highest expectations of our customers.

A look into the future

The year 2024 reminded us that even in uncertain times it is possible to grow, innovate and push the boundaries of what is possible. Our path is not easy, but thanks to the determination of our team and trust of our partners, we believe that a successful and promising future awaits us. Together, we will continue to deliver innovative solutions that improve lives and move our industry forward.

Sincerely,

INTERNATIONAL SALES NETWORK



MICROWELL Headquarters

Microwell operates in 3 business divisions /Dehumidication, Heating and UV Air Disinfection Solutions, Measurement and Control, Air conditioning and Ventilation/, employs 70 employees in 5 Branch offices in 3 countries: Slovakia, Czech Republic, Hungary/. The company has own manufacturing facilities, warehouse, R&D department.

The core strength of Dehumidication, Heating and UV Air Disinfection Solutions Division is its R&D team, that works hard, permanently focused on customers needs, to find new solutions and innovations.

Production & warehouse

Primary manufacturing facility located in 3.000m² venue. Office extends over 1.260m².

NEW IN 2025

SILVER INVERTER PRO

The Silver Inverter Pro brings year-round heating and cooling with capacities of 11, 15, 17, 21, and 28 kW in monoblock and split configurations. Its advanced airflow system ensures quiet, efficient performance, while prototypes with R290 (Propane) lead the way to a greener future.

Experience efficiency and sustainability with the Silver Inverter Pro.

Full model line read on **pages 48-52.**

NEW CONTROLLER

Our new smart controller combines advanced technology with user-friendly features. It includes a sleek touchscreen display, built-in Wi-Fi for seamless smart home integration, and RS-485 connectivity for Modbus communication. Fully customizable, it allows precise control of drying, fan management, and other accessories, making it an ideal solution for modern automation needs. Designed for efficiency and versatility, it's the perfect upgrades for Microwell dehumidifiers.

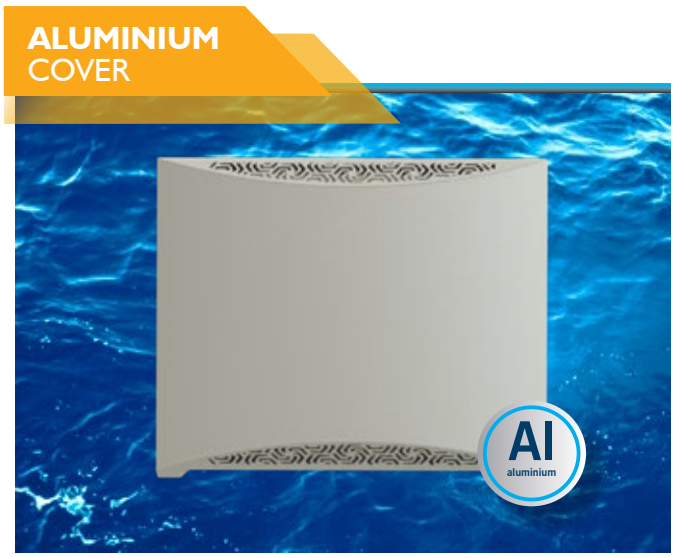
DRY ALU

All Microwell Dry 300, 400, and 500 dehumidifiers will feature aluminum covers, replacing steel. This upgrade offers:

- Higher Corrosion Resistance: Ideal for pool environments.
- Lighter Weight: Easier transport and installation.
- Improved Ventilation Design: Enhanced air circulation for optimal performance.

Experience the next level of durability and efficiency with our upgraded dehumidifiers.

Full model line read on **pages 15-21.**



ATHMOSS ATHMOSSphere

The essencial presence of the future.

Germicidal air purifiers

For offices, waiting rooms, retirement houses, event, fitness and shopping centers.

For industry premises, production halls.

Professional, powerful
Air purifier & Disinfector
safe to use at presence of people

Destroys viruses, bacteria and other microorganisms in the air.

The ATHMOSS germicidal air purifier will create a safe and healthy environment in your office, production hall or doctor's waiting room.

Swimming pool humidity under control

Microwell dehumidifiers solve humidity problems and maintain healthy pool environment by removing condensation and wet wall odour, and providing free heating through heat recovery.

Working on the principle of condensation, DRY swimming pool dehumidifiers are removing humid air from swimming pool hall, replacing it with dry and warm air.

WIFI

NEW DESIGN

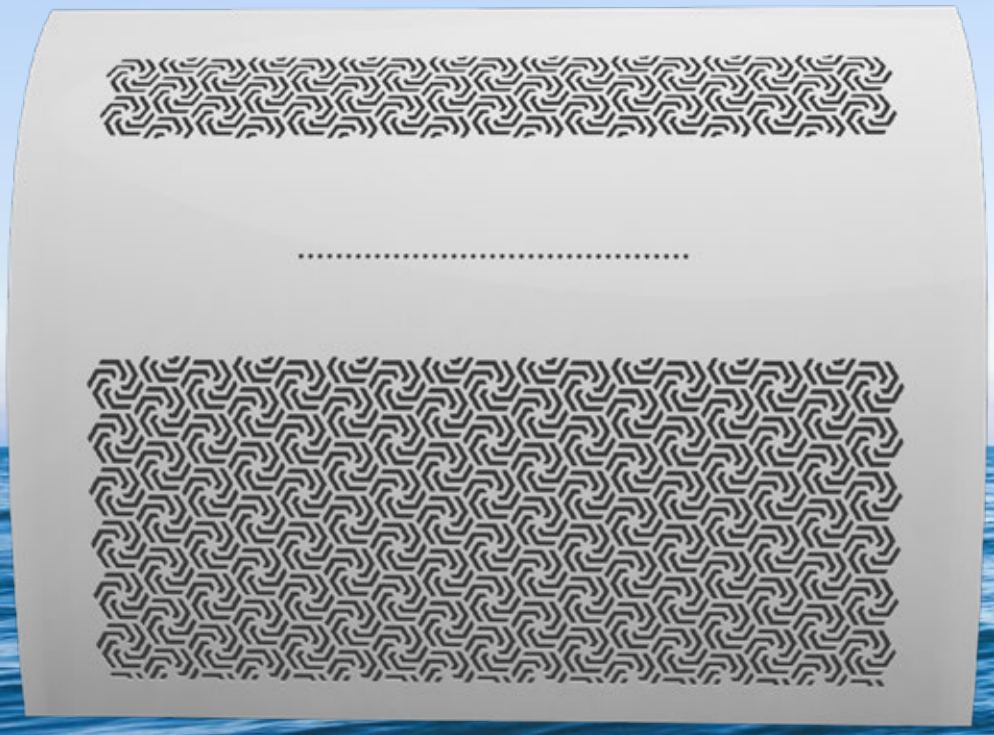
SELF-DIAGNOSIS

PASSIVE DEFROSTING

DOUBLE SILENT BLOCK

Smart Home RS-485

2025 NEW DESIGN



Microwell DRY Series swimming pool dehumidifiers come equipped with these features as standard:

- Touch digital controller
- WiFi
- Self-diagnosis
- RS-485 (ModBus)
- Passive defrosting - function available from +9°C
- Full functionality for all other accessories (heating, boiler control, PV ready, DRY contact, etc.), which can also be used after the device is installed
- For METAL/ALU models, the casing is made of aluminum (previously steel) - lower weight and higher corrosion resistance
- Double silent block for the compressor + additional noise reduction using SoundSteel material

MICROWELL

LEADING EUROPEAN SWIMMING POOL DEHUMIDIFIERS MANUFACTURER

www.microwell.eu

Custumized solution

Microwell provides tailored on-demand service for individual solutions for general prices similar to those of serial production

- Demand your tailor made solution & design by Microwell
- Select from 25 basic models
- Add from 50+ available accessories
- Create right-to-fit unit for your needs

If you did not find what you expected elsewhere, we may have a solution.

Basic description:

Special treatment to withstand high concentrations of salt, sulphur and chlorine. Designed for natural salt/sulphur water spa, salt caves or alternatives with natural water spring spa that contains high concentrations of salt or sulphur. This special treatment can be applied also to high chlorine concentration pools where it provides higher resistance thereby longer livelihood of the device. Treatment is also designed to avoid formation of sulphuric acid (H_2SO_4).

- Natural spa
- Salt caves
- Chlorine
- Sulphur

- Extra zinc
- Extra LCE Epoxy coating
- Extra powder coating enamel at 180°
- Extra brex insulation

Special treatment to withstand high concentration of SALT, SULPHUR and CHLORINE.

Suitable for natural salt/sulfur water spa, salt caves and pools with high concentration of salt, sulfur or chlorine.

DRY Salt+ Sulphur+

Heat pumps

ON-OFF & INVERTER models

Available in COMPACT & SPLIT versions

For seasonal, or full year using

Variety of models to fit every pool.

Excellent craftsmanship and experience.

MICROWELL HP range of swimming pool heat pumps are operating on the principle of renewable energy, designed for continuous and stable production of water heating or cooling.

Their exceptional efficiency, low environment impact and low costs are the result of superior technology, putting them at the industry's forefront.

Notes: The manufacturer reserves the right to change the parameters without notice.

Grade 1 titanium is the first of commercially available pure titanium grades. It is the softest and most ductile type of titanium material. It possesses the greatest **formability** and **excellent corrosion resistance.** Grade 1 titanium will ensure long happy life of your heat pump and will also prevent possible transport damage due to its **high impact toughness.**

INVISIBLE HEAT PUMP FOR WHIRLPOOL

ENJOY YOUR BELOVED WHIRLPOOL BATH WITHOUT WORRYING ABOUT ENERGY BILL

HEATING I COOLING

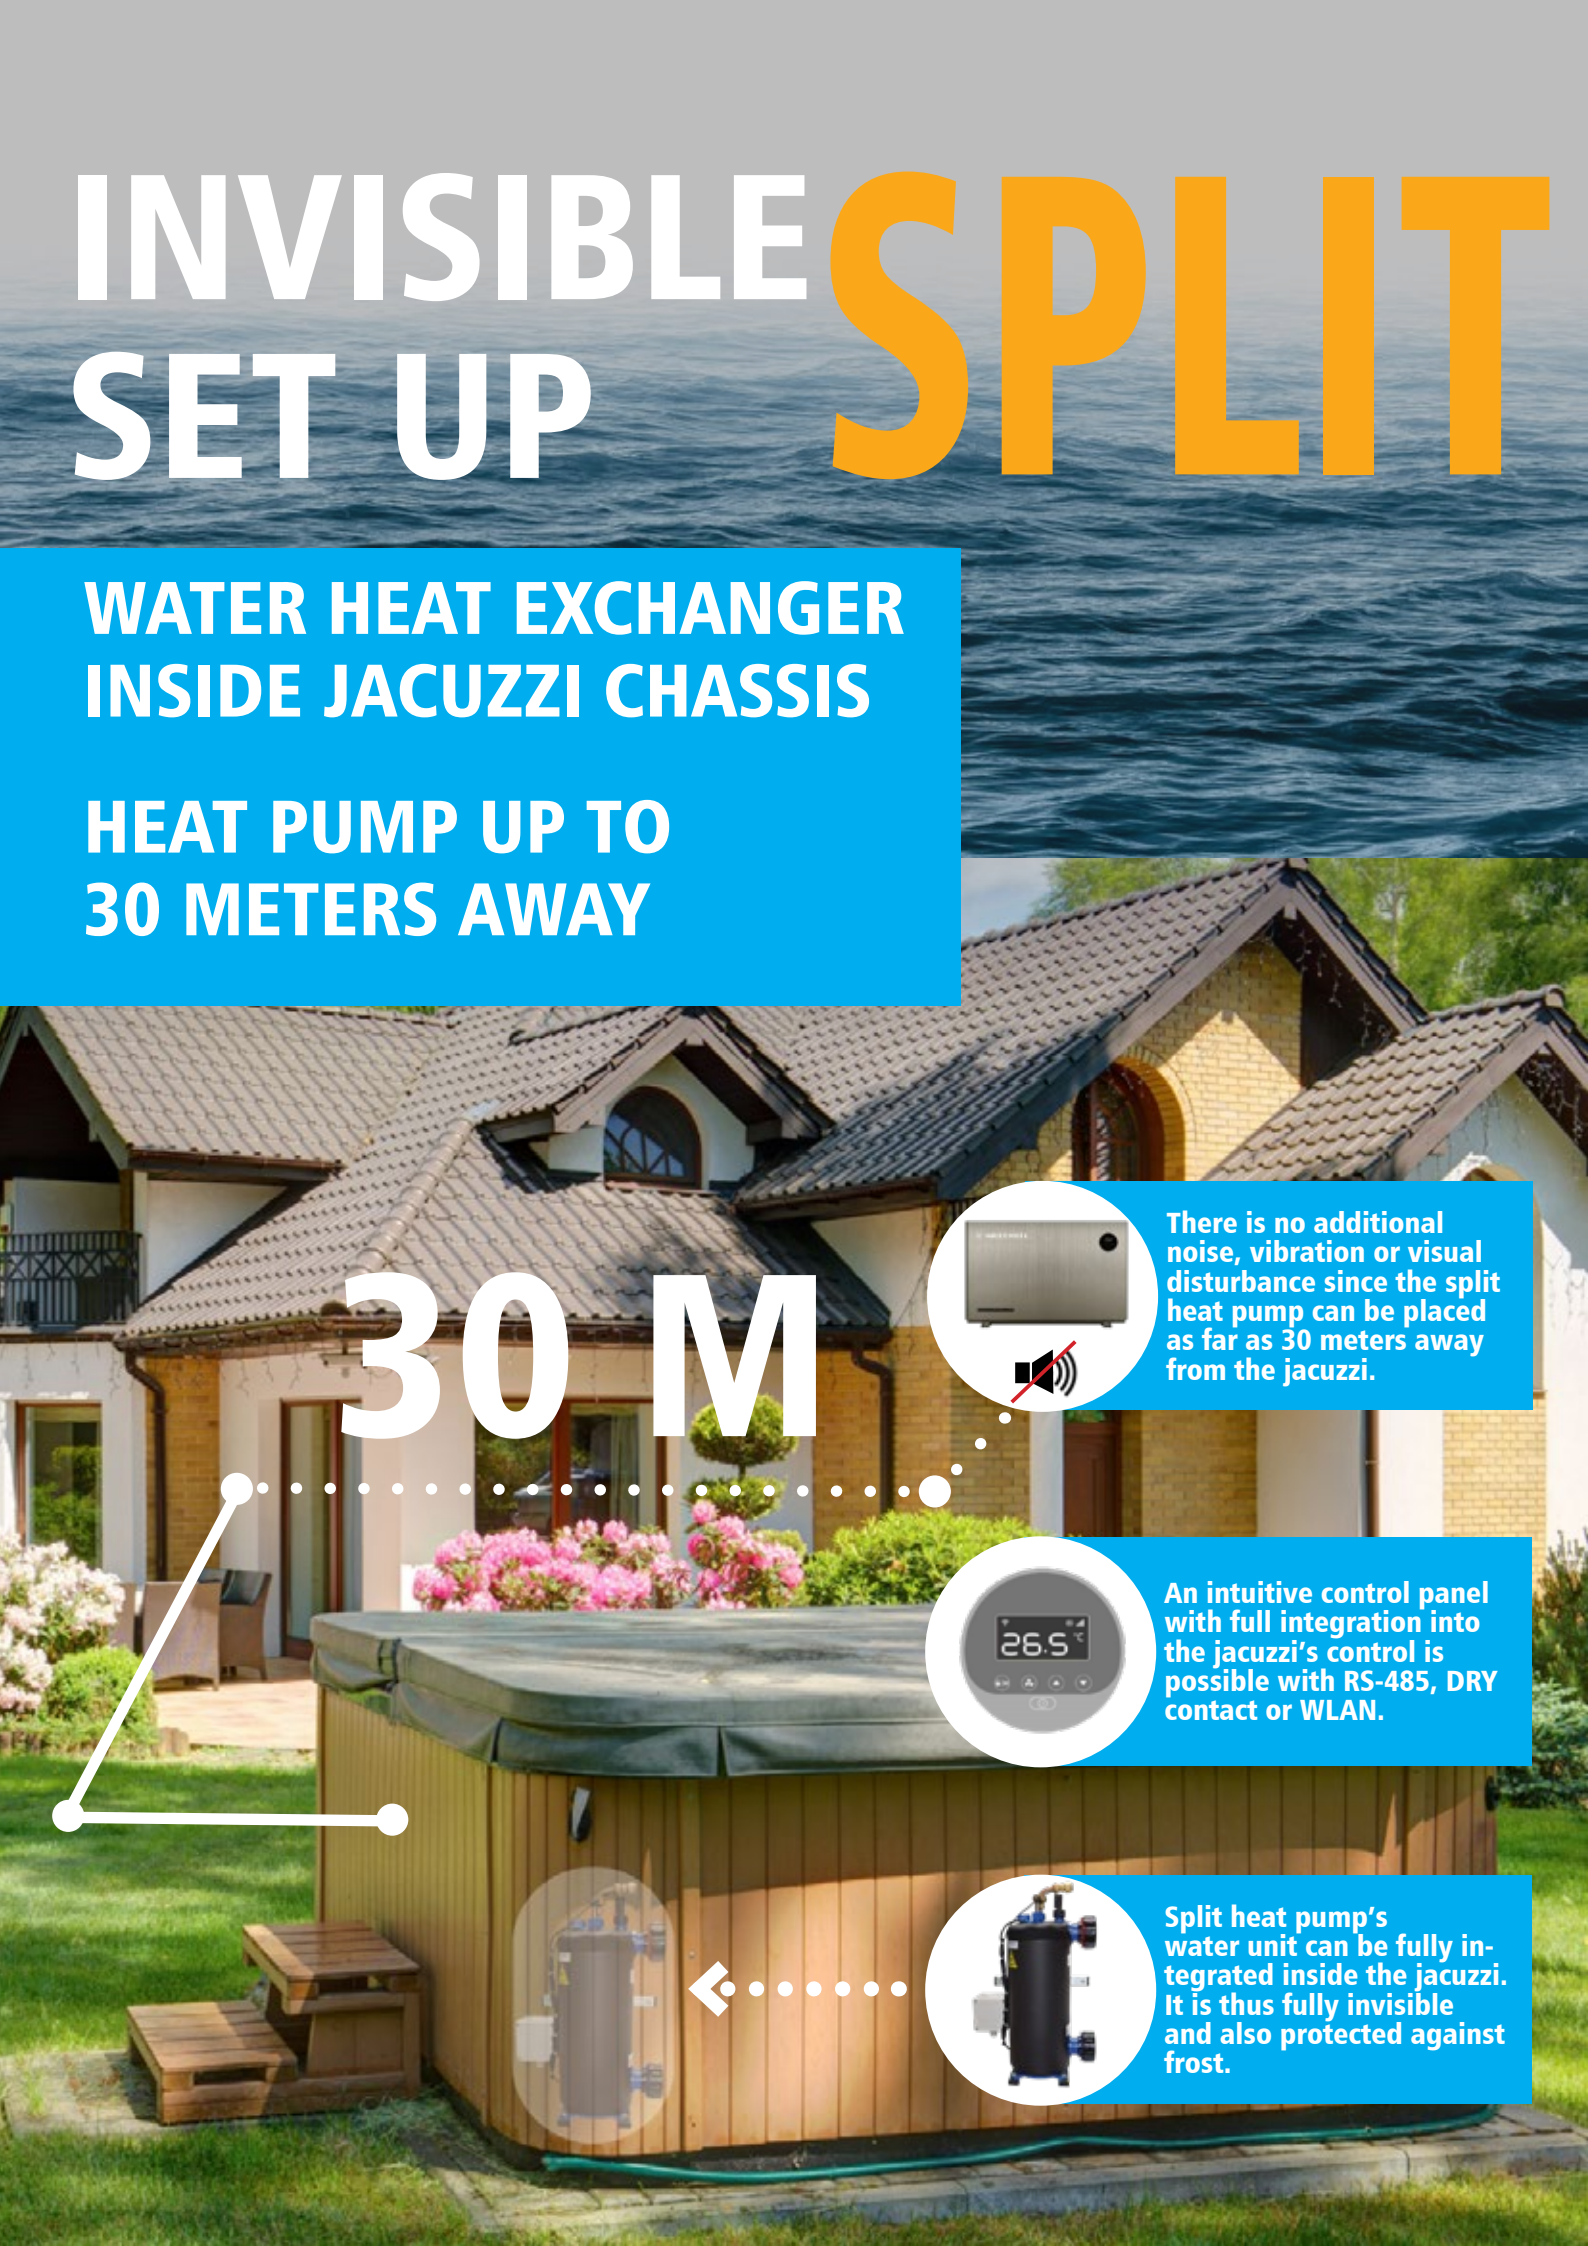
-15°C AMBIENT

+40°C WATER

INVISIBLE SET UP SPLIT

WATER HEAT EXCHANGER INSIDE JACUZZI CHASSIS

HEAT PUMP UP TO 30 METERS AWAY



There is no additional noise, vibration or visual disturbance since the split heat pump can be placed as far as 30 meters away from the jacuzzi.

An intuitive control panel with full integration into the jacuzzi's control is possible with RS-485, DRY contact or WLAN.

Split heat pump's water unit can be fully integrated inside the jacuzzi. It is thus fully invisible and also protected against frost.

MAX

SWIMMING POOL HEAT PUMP FOR AQUAPARKS AND BIG HOTEL POOLS

Commercial Microwell MAX air source swimming pool heat pump is designed for heavy duty heating and cooling pool jobs in 4 season environment.

Available capacities: 50kW to 450kW in single machine.

3 available makes:

1. 4-season Europe -10°C ~ +43°C 50Hz
2. Tropical Middle East 0°C ~ +55°C 50Hz
3. Tropical Middle East 0°C ~ +55°C 60Hz

MICROWELL

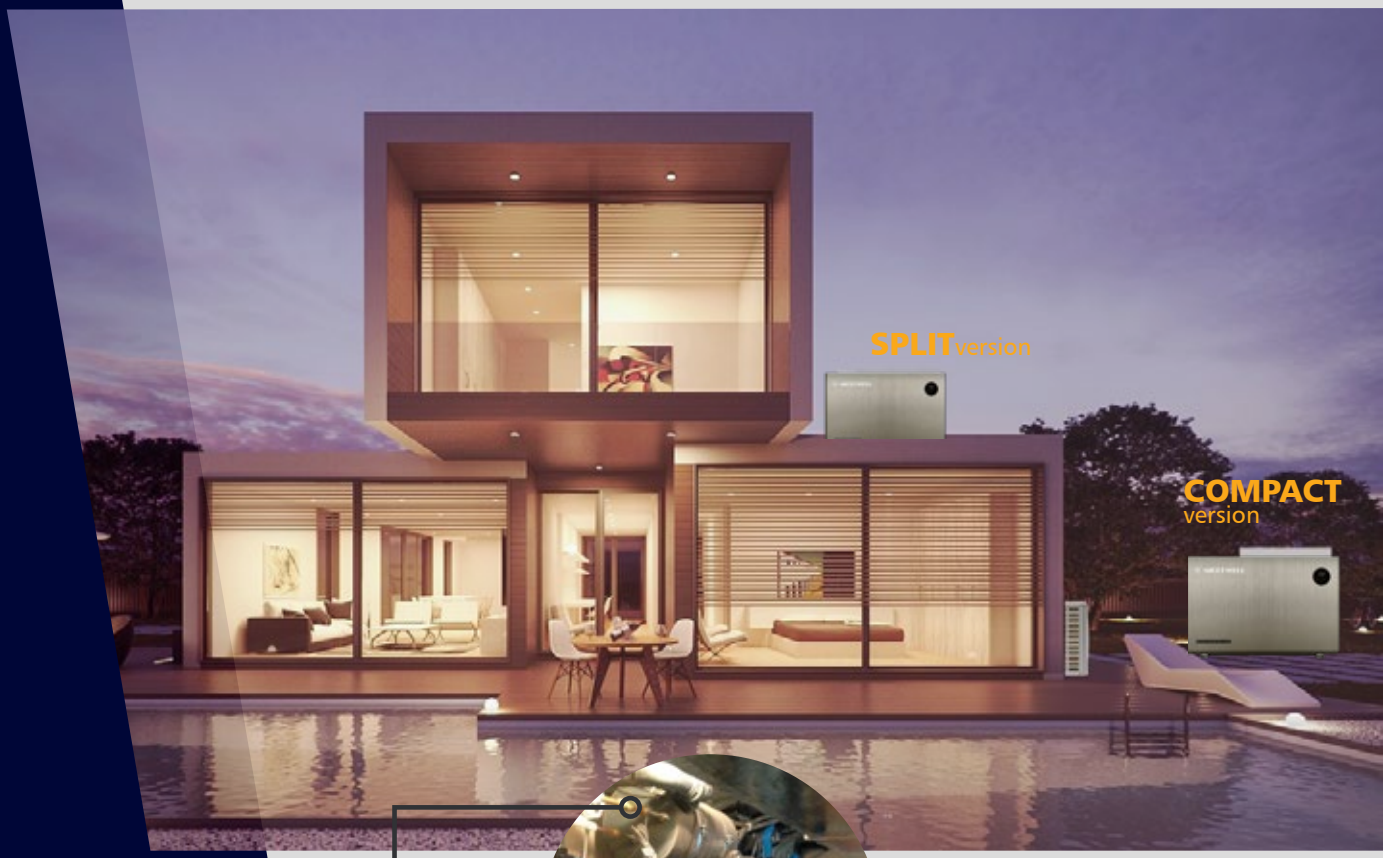
COMPACT versus SPLIT



- Comfortable full year heating
- Winterizing is not necessary
- No noise, no vibration, no visual distraction

"Split heat pump does not require winterizing because its water exchanger is placed in a place where it does not freeze, such as e.g. technical pool room, cellar or land."

v. 01/2025

Warranty period: 36 months

Main Features:

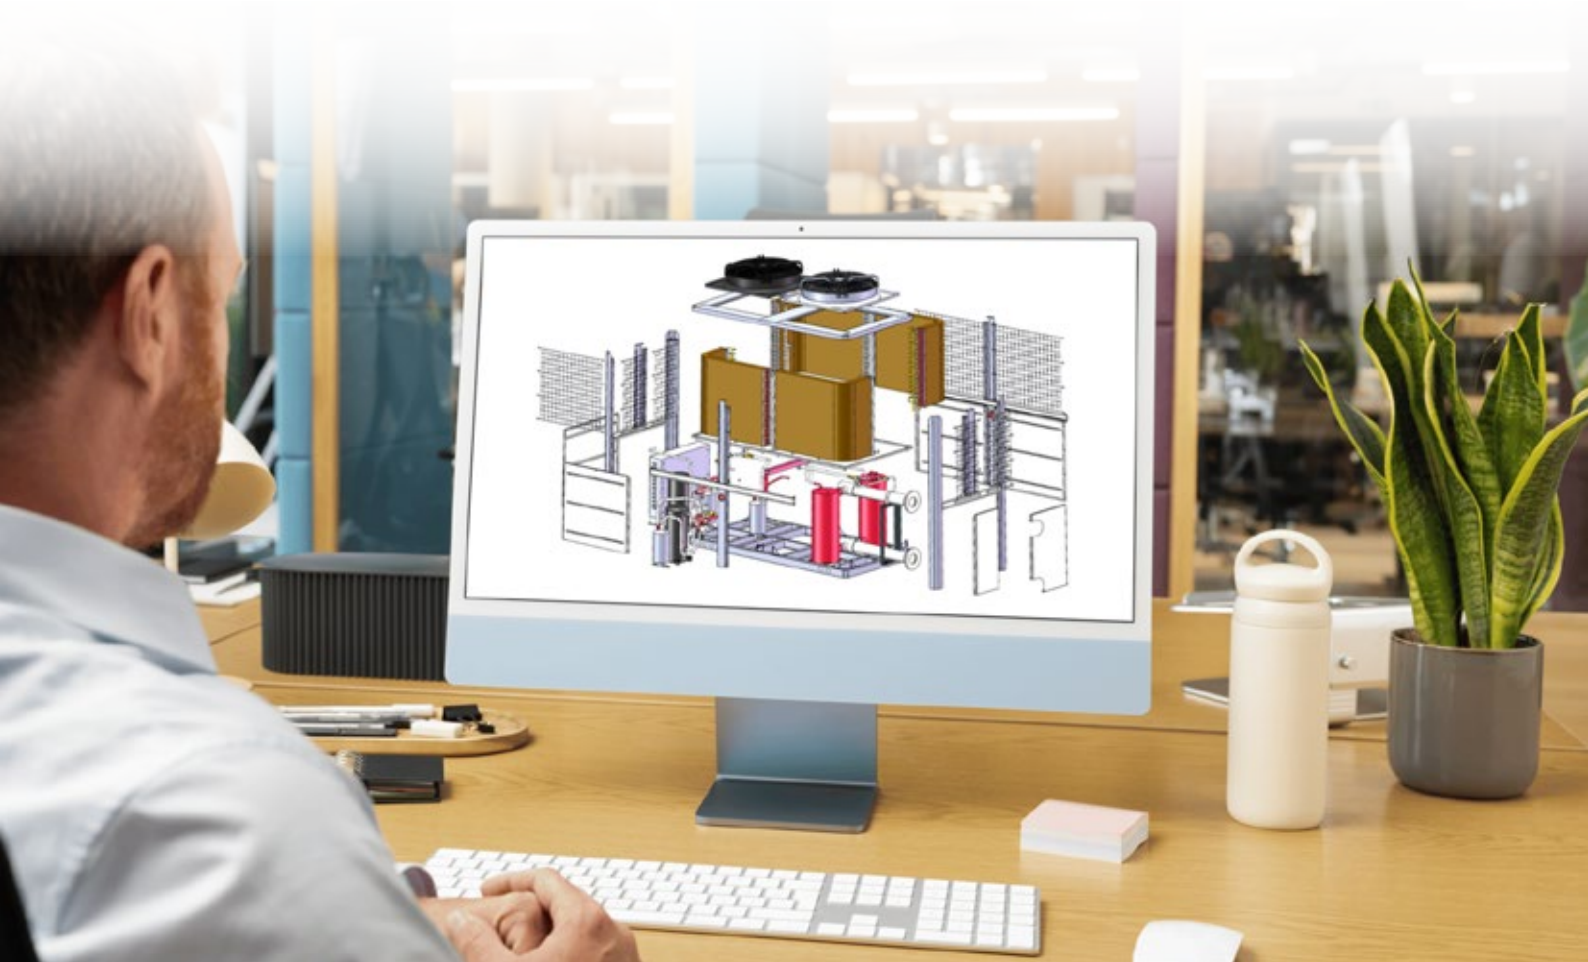
Commercial Microwell MAX / iMAX air source swimming pool heat pump is designed for heavy duty heating and cooling pool jobs in 4 season environment as well as in tropical conditions.

- Designed for EUROPEAN WEATHER from -10°C to +43°C and for MIDDLE EAST WEATHER 0°C to +55°C
- Durable metal design with multiple compressor system
- **Titanium Grade1** ASTM B265M used inside water heat exchangers designed to work fresh, salt or chlorine water
- Vertical fan discharge for ideal placement in noise damping chambers
- GoldFin hydrophobic epoxy protection of the fins against sea wind, sand, dust and effective de-icing
- Automatic overheat control to ensure heating and cooling in peak day time hot weather
- Automatic defrost to ensure heating operations during winter time
- Wide heating capacity with 50kW to 450kW provided by a single unit
- Primary phase monitor protection against incorrect order of the phases or missing phase
- T1/T3 Panasonic compressors with built-in automatic control logic for more energy saving
- Multiple fan speed mode to support low noise
- Electronic expansion valve for more precise refrigerant flow for maximum COP and kW at each weather condition
- Centralized control of up to 16 heat pumps (BMS)
- WIFI control compatible
- 3 years general spare parts warranty
- On-site service support possible
- 15 years of experience with applications

We are flexible in design and can provide unit as per your request. For example we can alter standard series height and reduce it as per your demand.

Units are made with utmost care. They are fully tested for performance not only in lab conditions but also in real life.

We can provide full documentation (e.g. manual, quick start-up guide, Modbus protocol, technical drawings, visuals, etc.)



MICROWELL

MULTIPLE

Heat pump up to 800m³

- Apply multiple Microwell heat pump units
- Up to 20pcs in parallel connection
- Up to 700kW power
- Save on transport & handling costs
- Make the maintenance & service easier and cheaper
- Use Smart step regulation
- ModBus available

MICROWELL

LEADING EUROPEAN SWIMMING POOL DEHUMIDIFIERS MANUFACTURER

www.microwell.eu

Accessories & Spare parts

Measurement and regulation
Installation material and equipment
Spare parts
Water surface covering
Ventilation

The widest selection of finishes and accessories.

Benefits that customers desire

Based on close relationship with customers, Microwell provides functionality throught matchless selection of accessory options.

Qmax - Heat pump TESTER

Save up to **30%** on energy bill

Carry-on measurement device designed to provide measurement and optimization of heat pump´s performance and efficiency	Price EXW w/o VAT /EUR/

Basic equipment:

- Carry on measurement device with inductive flow meter KROHNE Optiflux 2050 with connection DN50
- A pair of mobile WIKA Pt100 resistance thermometers
- Measurement device

1.	**Qmax-TESTER**	
	measures: water temperature inlet & outlet, true heating or cooling output, heat pump power consumption, water flow **counts:** Coefficient of performance /COP/, Energy efficiency ratio /EER/	**2 890**
2.	**Heat pump´s OPTIMIZATION**	
	executed by a Microwell trained technician	**99**

COEFFICIENT OF PERFORMANCE **COP** | ENERGY EFFICIENCY RATIO **EER** | WATER FLOW **m³/h** | WATER TEMPERATURE IN/OUT **°C** | HEATING/ COOLING OUTPUT **kW** | POWER CONSUMPTION **kW**

IMMEDIATE TESTING OF A HEAT PUMP

COMPATIBLE WITH ALL 1 PHASE HP

3. HUMIDITY VISUALIZATION

LED LIGHT | AUTO OPERATION | LOW ENERGY CONSUMPTION

microLIGHT+	Price EXW w/o VAT /EUR/

3.1. microLIGHT+ INFINITY

Operational temperature range: 0°C ... +60°C.
Compatibillity: All DRY range

3.1.A	microLIGHT+ INFINITY, length 1 m	**183.00**
3.1.B	microLIGHT+ INFINITY, length 3 m	**213.00**
3.1.C	microLIGHT+ INFINITY, length 5 m	**228.00**

3.2. microLIGHT+ LAMP

A freestanding table lamp.
MicroLIGHT+ LAMP measures and automatically reflects current relative humidity, changing the colour gradient between blue, green and red colour.

3.2.A	microLIGHT+ LAMP	**105.00**

/Change in Lamp model reserved./

3.3. microSTEAM+

Operational temperature range: 0°C ... +120°C.
Designed for ceilings of the swimming pool halls as LED humidistat for saunas.

3.3.A	microSTEAM+, length 1 m	**229.00**
3.3.B	microSTEAM+, length 2 m	**253.00**

Low humidity **0-40% RH** | Ideal humidity **40-60% RH** | High humidity **60-100% RH**

microLIGHT+ Integrated LED light strip indicating current humidity in a pool. Light spectrum from blue (humidity low) through green (all OK) to red (problem – humidity high) in full color gradient.

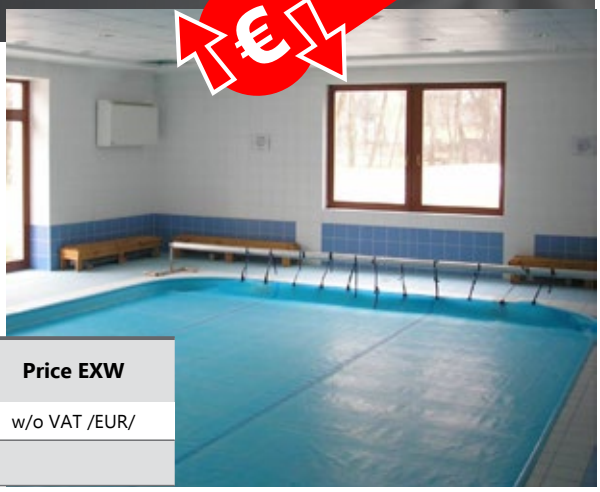
9. WATER SURFACE COVER

Price change reserved



A swimming pool cover reduces the actual evaporation by 30-50%. This means that you need a smaller dehumidifier for a given pool, you will save on energy bill since smaller unit consumers less electricity and also you will reduce heat losses of your water, thus you wil need smaller heating device (heat pump) and also it will consume less energy compared to pool without cover.
Blue buble plastic cover is a perfect solution for a domestic or hotel pool.

9.1 POOL COVER ROLLER	Price EXW w/o VAT /EUR/

v. 01/2025

Warranty period: 24 months

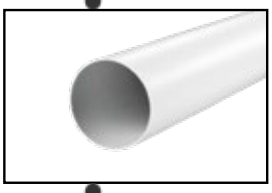
Bring fresh air into your pool and warm it with the dehumidifier.

Our Innovation: **FRESH AIR** SUPPLY

Each Microwell dehumidifier has fresh air supply possibility. The air inlet is located under the condenser, that way the incoming fresh air is effectively heated at no cost thanks to heat recovery.

Fresh air metal extension for connection to dehumidifier

+



Plastic circular hose

+

Plastic external louver

Compatibility to All DRY range.

FRESH AIR

ADDITIONAL VENTILATION

Saving energy, time & money
