

# HP 2800 Inventor

Models

Compact

Split

28.4 kW / 120 m<sup>3</sup>

**WATER FLOW**  
From 8 to 12 m<sup>3</sup>/h

**WATER EXCHANGER**  
Titanium of class Gr2 ASTM B338  
with surface up to 1.4 m<sup>2</sup>  
pressure drop max 5kPa

**COVER**  
Metal galvanized  
powder coatedgrates

**COMPRESSOR**  
SANYO  
scroll  
quiet & energy class A+  
microCOMPRESSOR+

**SILENT BLOCKS**  
antiVIBRATION+  
powder coatedgrates

**WATER CONNECTION**  
DN50 internal 6/4" thread

**ACTIVE DEFROST**  
4-way valve grates

**CONTROL PANEL**  
LCD display  
AUTO mode  
microECONOMY+  
antiFREEZE+

**COLOR**  
Self cleaning color

**AIR EXCHANGER**  
Gold fin epoxid  
anti-corrosion  
salt water resistant

**REFILLING VALVE**  
Valve for refrigerant

**AIR FAN**  
Axial air fan  
protection fan grates

**COP**  
up to **21.06**  
at Air 26°C / Water  
26°C / Humidity 80%

**Automatic  
HEATING  
COOLING**  
included

**FULL YEAR  
heating**  
**-15°C|+40°C**

**WIFI**  
control  
possible

MICROWELL HP 2800 Inventor is innovative pool water conditioning solution. It is a powerful heat pump suited for pools up to 120m<sup>3</sup> in volume. With 28.4 kW capacity it is optimised for large pools, delivering continuous and stable production of water heating or cooling.

Designed on the principle of renewable energy source, MICROWELL HP 2800 Inventor with exceptional efficiency has low environment impact and low costs consumption; all a result of superior Microwell technology.

**STANDARD EQUIPMENT:**

- MICROWELL HP heat pump
- Circulation pump control
- microCOMPRESSOR+
- microECONOMY+
- User manual

**ACCESSORIES:**

- Winter module
- Heat exchanger frost protection
- Condensate tray defrost
- Protection cover
- Hydro kit
- Control panel placement
- Split model connection length
- Smart WIFI control

Microwell reserves the right to change the technical data without notice.

	Pool capacity (cover / no cover)	Heating capacity (A25/W10/RH35%)	Cooling capacity (A30/W35)	(A26/W26/RH63%)			Operating temperature	Water flow		Power supply	Heat exchanger	Titanium surface	Acoustic pressure level	Water circuit connection	Dimensions (condensing unit + water unit with box (without box))
				Heating output	Power consumption	COP		m <sup>3</sup> / h	kPa

HP 2800 Split INVENTOR															942 x 1250 x 360 + 1045x370x430 (970x275x340)

MICROWELL HP range of swimming pool heat pumps is a full capacity range operating on the principle of renewable energy, designed for continuous and stable production of water heating or cooling in any pool environment. Their exceptional efficiency, low environment impact and low costs are the result of superior technology, putting them at the industry's forefront.

Now, the novelty is launching into the market - HP INVENTOR, with great new features.

### INCREDIBLE EFFICIENCY OF HP RANGE

Efficiency of Microwell heat pumps is proven to be the best. Designed to reach the top results, they are able to extract heat or cold present in ambient environment and leverage it into the pool water. While heating, higher the ambient air temperature is, the more free energy can the heat pump extract operating with high efficiency. At favourable conditions users of Microwell heat pumps pay less than 15% of heat meaning 85% of the heat is free.

- At lowest cost possible
- In shortest possible time
- With lowest noise possible

### microECONOMY+

Microwell heat pumps are designed to produce the highest energy yield by carefully planned operational rhythm of a circulation pump. microECONOMY+ is a technology of the most economy circulation pump control. Microwell swimming pool heat pump with microECONOMY+ ensures heating of your pool sooner and cheaper than any other swimming pool heat pump.

### HP COMPACT vs HP SPLIT

**COMPACT** heat pump is one device, that provides desired water temperature in the pool.

It requires only water connection, power supply and convenient place to be installed. Simple and affordable system.

Microwell **SPLIT** heat pump system was designed to combine all positives of a swimming pool heat pump and to eliminate all negatives. By delivering renewable energy and low energy pool water conditioning, Microwell Split heat pumps are heating warm water all year long at low cost and without any acoustic or visual disturbance. They are ideal solution for outdoor as well as indoor pools.

### AUTOMATIC HEATING / COOLING

Designed to reach the top results, they are able to change the mode fluently from heating to cooling, or other way round. It depends on the setting of the required pool temperature.

Market's most efficient swimming pool heating solution.
